

Mahyar Zarghami

Address: 6000 J Street, Sacramento, CA 95819

Tel: 916-278-7113

Email: mahyar.zarghami@csus.edu

Education

- 2005-2008 **Missouri University of Science & Technology** (formerly **University of Missouri-Rolla**), Rolla, MO, USA
Ph.D., Electrical Engineering
- 1999-2001 **Sharif University of Technology**, Tehran, IRAN
M.Sc., Electrical Engineering
- 1988-1993 **K.N. Toosi University of Technology**, Tehran, IRAN
B.Sc., Electrical Engineering

Appointments

August 2011- Present

Assistant Professor
Electrical and Electronic Engineering Department,
California State University, Sacramento, California, USA

- Teaching
- Research activities in California Smart Grids Center (CSGC)
 - Volt-VAr control.
 - Load demand peak-shaving using heuristic methods.
 - Conservation Voltage Reduction (CVR).
 - Integration of renewable energy sources in distribution and transmission systems.
 - Application of synchronized measurements in wide-area control and protection of large-scale power systems.

Jan. 2009- August 2011

Senior R&D Engineer
US Corporate Research Center, ABB Inc., Raleigh, North Carolina, USA

- Indoor LVDC (Project Leader)
 - Research and investigation on the applications of low voltage DC distribution in commercial buildings, Data and Communication centers.
- Energy Storage Systems for DC Railway Applications
 - Research and investigation on the application of energy storage technologies such as ultracapacitors and flywheels in DC railway systems for increasing the efficiency of the railway system.
- CES (Community Energy Storage)
 - Optimized charge/discharge of CES units for reducing Utility's costs.
- Wind Turbine Aggregation Modeling

Mahyar Zarghami

- Aggregation of the wind turbines in the wind farms based on coherent grouping with Wake modeling and conservation of power losses.
- Wide Area Protection with WAMs
 - Voltage collapse protection with WAMs using a combination of sensitivity, VIP (Voltage Instability Predictor) and SDI (S Difference Indicator) methods.
 - Out of step protection with WAMs using synchronized power measurements.
- Integrated Power System Simulation for Electric Ships
 - Investigation of new design concepts for all-electric ship integrated power systems (IPS).
 - Steady-State and Dynamic simulation and analysis of electric ship designs.
- Distribution Feeder Event Analysis (DFEVA)
 - Zone Identification, Fault Classification and Fault Location of the distributed feeders using measured data from IEDs (Intelligent Electronic Devices). Included programming with C and AFL.
- DMS600 UBLF (Unbalance Load-Flow, ABB Product)
 - Design and implementation of the code for unbalanced network modeling, topology analysis and unbalanced load-flow engine in DMS600 MicroScada (ABB product). Included programming with Visual C++.
- CDS (Common Design System, ABB product)
 - Design and Optimization of Distribution Transformers using heuristic and analytical methods. Optimization with MATLAB and Frontline. Included programming with Visual Basic .NET.

May 2005-Dec. 2008

Research Assistant

Rolla, MO, USA

Electrical Engineering Department, University of Missouri-Rolla

- Methods for damping inter-area oscillations by FACTS controllers.
- Dynamic state estimation in large scale power systems based on combinations of local and global synchronized measurements.
- Dynamic placement of the FACTS controllers with modal analysis.

Jan. 2005-May 2005

Research Assistant

Rolla, MO, USA

Real-Time Power and Intelligent System Laboratory, University of Missouri-Rolla

Wide-Area Protection of Power Systems using LVQ (Learning Vector Quantization) Neural Networks.

Nov. 2001-Dec. 2004

Project Manager

MATN Co. (Electric Power Technology Center), Tehran, IRAN

- Comprehensive Distribution System Planning for Ilam, Sanandaj and Behbahan cities in Iran.

Mahyar Zarghami

- Distribution system data collection, database formation, load-flow analysis, short-circuit analysis, relay and fuse coordination, medium and long-term load forecast, reliability analysis, optimal sub-transmission and distribution substation placement, optimal feeder placement.

- Development of the MATNex software

- Object oriented programs with Visual C.NET for balanced and unbalanced radial and weakly meshed distribution systems, including load-flow analysis, short-circuit analysis and fuse coordination.

- Design and implementation of distribution system database with Microsoft Access.

- GIS based software implementation for analysis and design of distribution networks using Autocad.

- Interfacing MODEC with DIgSILENT

- Development of programs in Visual C .NET for data conversion between MODEC and DIgSILENT software packages.

March -Dec. 2004

Consulting Engineer

MATN Co. (Electric Power Technology Center), Tehran, IRAN

- Preliminary Studies on Enhancement of the Iranian Transmission Power System

- Participation in technical sessions conducted by TAVANIR (Company responsible for the operation of Iran's transmission network).

June 1999- Nov. 2001

Consulting Engineer

A.P.S. Consultants (Awdge Pazhoohesh Sanaat), Tehran, IRAN

- Distribution Plants Design and Analysis (for Pars-Khodro Company, Bandar Abbas Graving Dock, Kerman-Khodro Co., Caspian Sea Semi-Submersible Petroleum Harbor)

- Feasibility studies on substations type, load analysis and modeling, load-flow analysis, optimal feeder placement, short-circuit analysis, relay and fuse coordination.

- Development of the RadIRing software packages

- Object oriented programs developed in Visual C++ for the design and analysis of radial industrial distribution networks. Including load-flow, short-circuit, load-modeling, cable and feeder design and placement.

March 1996- June 1999

Research Engineer

MATN Co. (Electric Power Research Center), Tehran, IRAN

- Application of Expert Systems to Fault Diagnosis in Touss Power Plant, Mashad, IRAN

- Design and implementation of a model-based expert system for fault diagnosis in Touss power plant located in Mashad, Iran. Include programming with Borland C++.

- Topology Determination of the Iranian Transmission Power Network

Mahyar Zarghami

- Design of a new algorithm for determination of the topology of the Iranian HV network based on conditions of the loops before and after switching operations. Include programming with Pascal.

- Contingency Analysis of the Iranian HV Network

- Implementation of different contingency scenarios in the transmission network for finding remedial actions in response to worst case conditions. Included programming with Borland C++.

Oct. 1998- August 1999

Consulting Engineer

Kerman Regional Power Authority, Kerman, IRAN

- Alarm Processing in the Iranian South-East Dispatching Center by Expert Systems

- Extraction and implementation of a hypothesis-based expert scheme for processing numerous cascading alarms in the dispatching center in order to create simple and short meaningful sentences for system operators. Included programming with Borland C++.

Sep. – Dec. 1995

Consulting Engineer

MATN Co. (Electric Power Research Center), Tehran, IRAN

- Applying Sparse Techniques to the simulation of HVDC Systems

- Design and implementation of sparse techniques to the simulation of large HVDC systems. Included programming with Pascal.

April – Oct. 1994

Consulting Engineer

MATN Co. (Electric Power Research Center), Tehran, IRAN

- Load-Flow of Large Scale Radial Distribution Systems

- Design and implementation of an algorithm for load-flow analysis based on dividing the system into multiple sub-networks for minimizing the need for memory space. Included programming with Pascal.

Teaching Experience

August 2007 - Present

Assistant Professor

Electrical and Electronic Engineering Department, California State University, Sacramento

- Electromechanics Laboratory (EEE 131)
 - Undergraduate level, 1 credit hour, laboratory.
- Smart Electric Power Grid (EEE 136)
 - Undergraduate level, 3 credit hour, lecture.
- Power System Analysis (EEE 141)
 - Undergraduate level, 3 credit hours, lecture.
- Energy Systems Control and Optimization (EEE 142)
 - Undergraduate level, 3 credit hours, lecture.
- Advanced Analysis of Faulted Power Systems (EEE 250)

Mahyar Zarghami

- Graduate level, 3 credit hours, lecture.
- Power System Reliability and Planning (EEE 252)
 - Graduate level, 3 credit hours, lecture.
- Introduction to Future Power Systems and Smart Grids (EEE 255)
 - Graduate level, 3 credit hours, lecture.
- Wind Energy Electrical Conversion Systems (EEE 257)
 - Graduate level, 3 credit hours, lecture.
- Advanced Topics in Power Systems (EEE 259)
 - Graduate level, 3 credit hours, lecture.

August 2007 – Dec. 2007

Instructor

Electrical and Computer Engineering Department, University of Missouri-Rolla

- Electromechanics (EE 205)
 - Undergraduate level, 3 credit hours, lecture.

2000

Teaching Assistant

Electrical Engineering Department, Sharif University of Technology

- Electric Machinery
 - Undergraduate level, 3 credit hours, lecture. Taught for one semester.
 - Responsibilities included holding review sessions covering dc and ac machinery fundamentals.

Professional Training

June – Sep. 2013

High Voltage Direct Current Transmission

University of Aberdeen, UK

Oct. – May 2010

Real-Time Digital Simulator (RTDS®)

ABB Inc., Raleigh, NC, USA

Nov. 2003

High Voltage Substation Design

MATN Co., Tehran, IRAN

Sep. 2003

DIgSILENT

MATN Co., Tehran, IRAN

Dec. 2002 – June 2003

Web Programming with ASP .NET

**Sharif University of Technology,
Tehran, IRAN**

Jan. 1999

Visual C++

MATN Co., Tehran, IRAN

Mahyar Zarghami

Honors

- Technical paper "A Wide-Area Loss-Index Based method for Voltage Instability Protection" chosen among the best conference papers in *IEEE Power and Energy Society (PES) General Meeting 2014, July 27-31*.
- Selected Researcher by Iran's Committee of Electrical & Electronics Engineers in year 2004.
- Selected author for the paper: "A Frequency-Dependent Root-Matching Scheme in Electromagnetic Transient Analysis", *5Th Power Seminar, Shahid Abbaspour University, 15-17 October 2003, Tehran, IRAN*.
- 1st rank as the representative of Electrical Department of MATN Co. in Educational Services for the years 1997 & 1998.

Skills

- Computer Languages: FORTRAN, Pascal, C++, Borland C++, Visual C++, Visual C .NET, C#, Visual Basic
Familiar with Java, UML
- Engineering Software Packages: PSCAD/EMTDC, MATLAB/Simulink, DIGSILENT
Familiar with: pSpice
- Optimization Toolbox: Frontline
- Web Skills: HTML, FrontPage, ASP, ASP.NET, JavaScript
Familiar with: VBScript
- Database: Microsoft Access
Familiar with SQL Server
- Cad Skills: Autocad

Affiliations

2014- Present	Senior Member , IEEE
2008-2014	Member , IEEE
2005- 2008	Student Member , IEEE
2002-2005	Member , Iranian Association of Electrical & Electronics Engineers (IAEEE)
2004-2005	Member , Iranian Solar Energy Society

Professional Activities

2012-present	Secretary , IEEE Sacramento Valley Section.
2012-present	Vice Chair , Power and Energy Society, IEEE Sacramento Valley Section.
2011	Co-chair , Smart Grids track, IEEE Green Technologies Conference.

Publications

Journals

- 1) M. Zarghami, Mariesa L. Crow, S. Jagannathan, "Nonlinear Control of FACTS Controllers for Damping Interarea Oscillations in Power Systems", *IEEE Transactions on Power Delivery*, vol. 25, no. 4, pp. 3113-3121, Oct. 2010.
- 2) M. Zarghami, Mariesa L. Crow, S. Jagannathan, Y. Liu, S. Atcitty, "A Novel Approach to Inter-Area Oscillation Damping by Unified Power Flow Controllers Utilizing Ultracapacitors", *IEEE Transactions on Power Systems*, vol. 25, no. 1, pp. 404-412, Feb. 2010.
- 3) M. Zarghami, Mariesa L. Crow, "The Existence of Multiple Equilibria in the UPFC Power Injection Model", *IEEE Transactions on Power Systems*, vol. 22, no. 4, pp. 2280-2282, Nov. 2007.
- 4) A.M. Ranjbar, M.R. Nahass, F. Shahbazi, M. Zarghami, "Optimal Load-Shedding to Avoid Line Overloads in Emergency Conditions For Iranian Network", *Bargh Journal of Electrical Science and Technology*, no. 23, Feb. & March 1998.
